

# BOOTS & BLADES 2026

THE FIGURE SKATE COMPANY

AMBER GLENN, United States, Grand Prix Final Champion, Grand Prix Gold Medalist, US Champion, US Junior Champion, Junior Grand Prix Medalist

## YEARS OF FIGURE SKATING

2026 marks a milestone in our story—Jackson Ultima’s 60th anniversary. What began with the vision of World Champion and Olympic Medalist Don Jackson has grown into a brand trusted by skaters around the globe. For six decades, our passion has been to equip skaters of every level with the very best skates, boots, and blades—crafted through innovation, dedication, and an unwavering commitment to the skating community. From first steps on the ice to the most breathtaking performances on the world stage, Jackson Ultima has been there to support the journey.

Don Jackson’s legacy is at the heart of who we are. His historic triple lutz, his achievements as an athlete, and his lifelong dedication to the sport embody the drive, courage, and artistry that inspire our mission. As we celebrate 60 years, we honor his vision by continuing to push boundaries, listen to skaters, and create products that empower them to reach new heights. The future of skating is bright, and at Jackson Ultima, we are proud to carry Don’s legacy forward—building on six decades of excellence as we look to the next chapter with the same passion that started it all.

# THE JACKSON ADVANTAGE

...for the Love of Skating

## Legendary Combinations

With our **Heat Moldable Fit System**, heat is used to soften and mold the boots. As the boot cools, it retains the shape of your foot, even in cold climates.

Our **Fusion Sole** is made from a light-weight nylon composite. It is torque resistant and waterproof. The rubber inlay provides a non-slip blade mount & superior shock absorption.

Our **PBX Sole** is flexible yet rigid, offering unmatched lightweight and strength. In combination with ABS in-soles and a rubber inlay for a non-slip blade mount, this sole boasts a sleek, low-profile look and feel.

Moderate

Firm

Strong

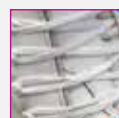

Ultimate

The appropriate level of support is critical to skater performance and injury prevention. Selecting a boot that is too stiff for a skater's ability and physical characteristics can drastically impede the flexibility necessary to perform and develop skating skills. It can also result in injury as the skater is unable to properly break in the boot. Conversely, a boot that is too soft will result in a lack of support, impacting performance and can lead to premature breakdown of the product. Our Support Rating System makes it easy to select your boot of best fit.

## The Jackson Wrap System

**Cuff wrap** with internal leather reinforcement for strength & support

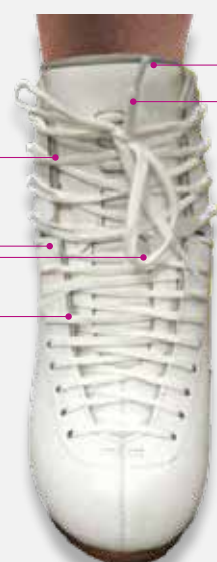

**Achilles cushion, soft cuff, & U-shape throat** for comfort & stability

**Shin cushion, tongue support & lace guides** for superb comfort & to eliminate lace bite

**Graduated instep wrap** with **flex notch** to minimize knee/ankle strain while supporting ankle flexibility

Designed for exceptional fit, the Jackson Wrap System secures your foot, stops internal movements and slipping, and provides better stability. An internal layer of leather provides enhanced strength, support, and comfort. Performance Flex Notch, standard on Jackson Boots minimizes ankle and knee strain on forward flex while improving stability.

Boots + Blades =

# FIT GUIDE

While the chart below is a guideline, product selection should be facilitated by an experienced Skate Technician & an Authorized Jackson Dealer.

	Mass /Jumps	Singles	Doubles	Triples/ Quads
BOOTS	Less than 30 kg	Flex Entré	Flex Entré	Debut Synergy Spark
	30 - 58 kg	Flex Entré Debut	Debut Premiere 5000 Series Synergy Spark Synergy Ignite	Premiere 5000 Series Synergy Spark Synergy Ignite
	More than 58 kg	Entré Debut	Premiere 5000 Series Synergy Spark Synergy Ignite	5000 Series Synergy Ignite Synergy Torch
BLADES	All Skaters	Aspire XP Legacy Matrix Legacy	Legacy Matrix Legacy Apex Advanced Matrix Advanced Matrix RXS	Apex Advanced Matrix Advanced Matrix RXS
COMPLETE SKATES	Less than 30 kg	Elle, Freestyle		
	More than 30 kg	Freestyle		

From our point of view, the importance of healthy humans is paramount. We also recognize the weight words hold. We have redefined our charts to reflect that, as well as the reality that we craft products that are subject to the rules of physics. Without getting too technical, the values represent the products we suggest given the physical demand that will be expected of them. We believe in providing the best skating experience for everyone, and that strength and power come in all shapes and sizes.

## A Fit For All Feet

A consistent shape and fit extends throughout our product line, making for a seamless transition from our 2000 Series of boots to our 5000 & 6000 Series. Fit is established by the Last, which defines the shape and dimensions of the boot. All Jackson boots are made on the Jackson Elite Performance Last, which provides a much rounder shape in the toes with tighter heels for a competitive fit.

All of our boots are available in Regular (A/B) widths or Wide (C/D) options. Our unique Heat Moldable Fit System allows for our boots to be shaped to each individual skater, offering an excellent heel lock - ideal for those with flat feet - and a product of best fit for a greater variety of feet.

While standard sizes fit most, our Jackson Custom program can build a boot to your exact specifications. We have an extensive inventory of Lasts (AAA to EE) to fit all foot shapes.

We are indebted to the many Jackson athletes who have offered their input on the design features of our boots & blades. Your participation in our performance testing is the foundation of our product development and we are eternally grateful.

## PROSUPPORT + FB7000

### Support Redefined

Double Poron pads for increased shock absorption through the heel

Made from bamboo charcoal fabric, which has a far-infrared release rate of >80%, helping with circulation and warmth

Featuring a raised metatarsal pad that redistributes pressure, improves circulation, and enhances stability & control

A multi-function layer that provides ventilation & deodorization, while offering anti-slip shock absorption

Protective arch support

Subtalar joint lock, guiding the foot through the intricate skating movement while preventing over pronation or over supination

Unique memory layer that, in addition to arch support, aids in correcting alignment, leading to better balance and more comfort

Rigid structural layer wraps the heel for increased support and balance

## 5000 Series

*For Highest Demands*

### SUPREME 5300

AVAILABLE

### SUPREME 5362

AVAILABLE

- Durable leather or suede upper
- Microfiber lining with memory foam
- Supreme 6000 Tongue
- Split leather reinforcements
- Extended instep wrap
- Inlaid Swarovski crystals (Women's)

### SUPREME PRO 5320

### GET LOW

Greater flexibility; Dance & Synchro

### SUPREME LOW CUT 5430

### SUPREME LOW CUT 5462

# TONGUE CUSTOMIZATION

*Crafting the Perfect Fit*

6000

- 2.5 cm thick
- Comfort felt retains strength
- Molded insert prevents lace bite
- Design locks the tongue in place
- Flex design provides support without restriction

5000

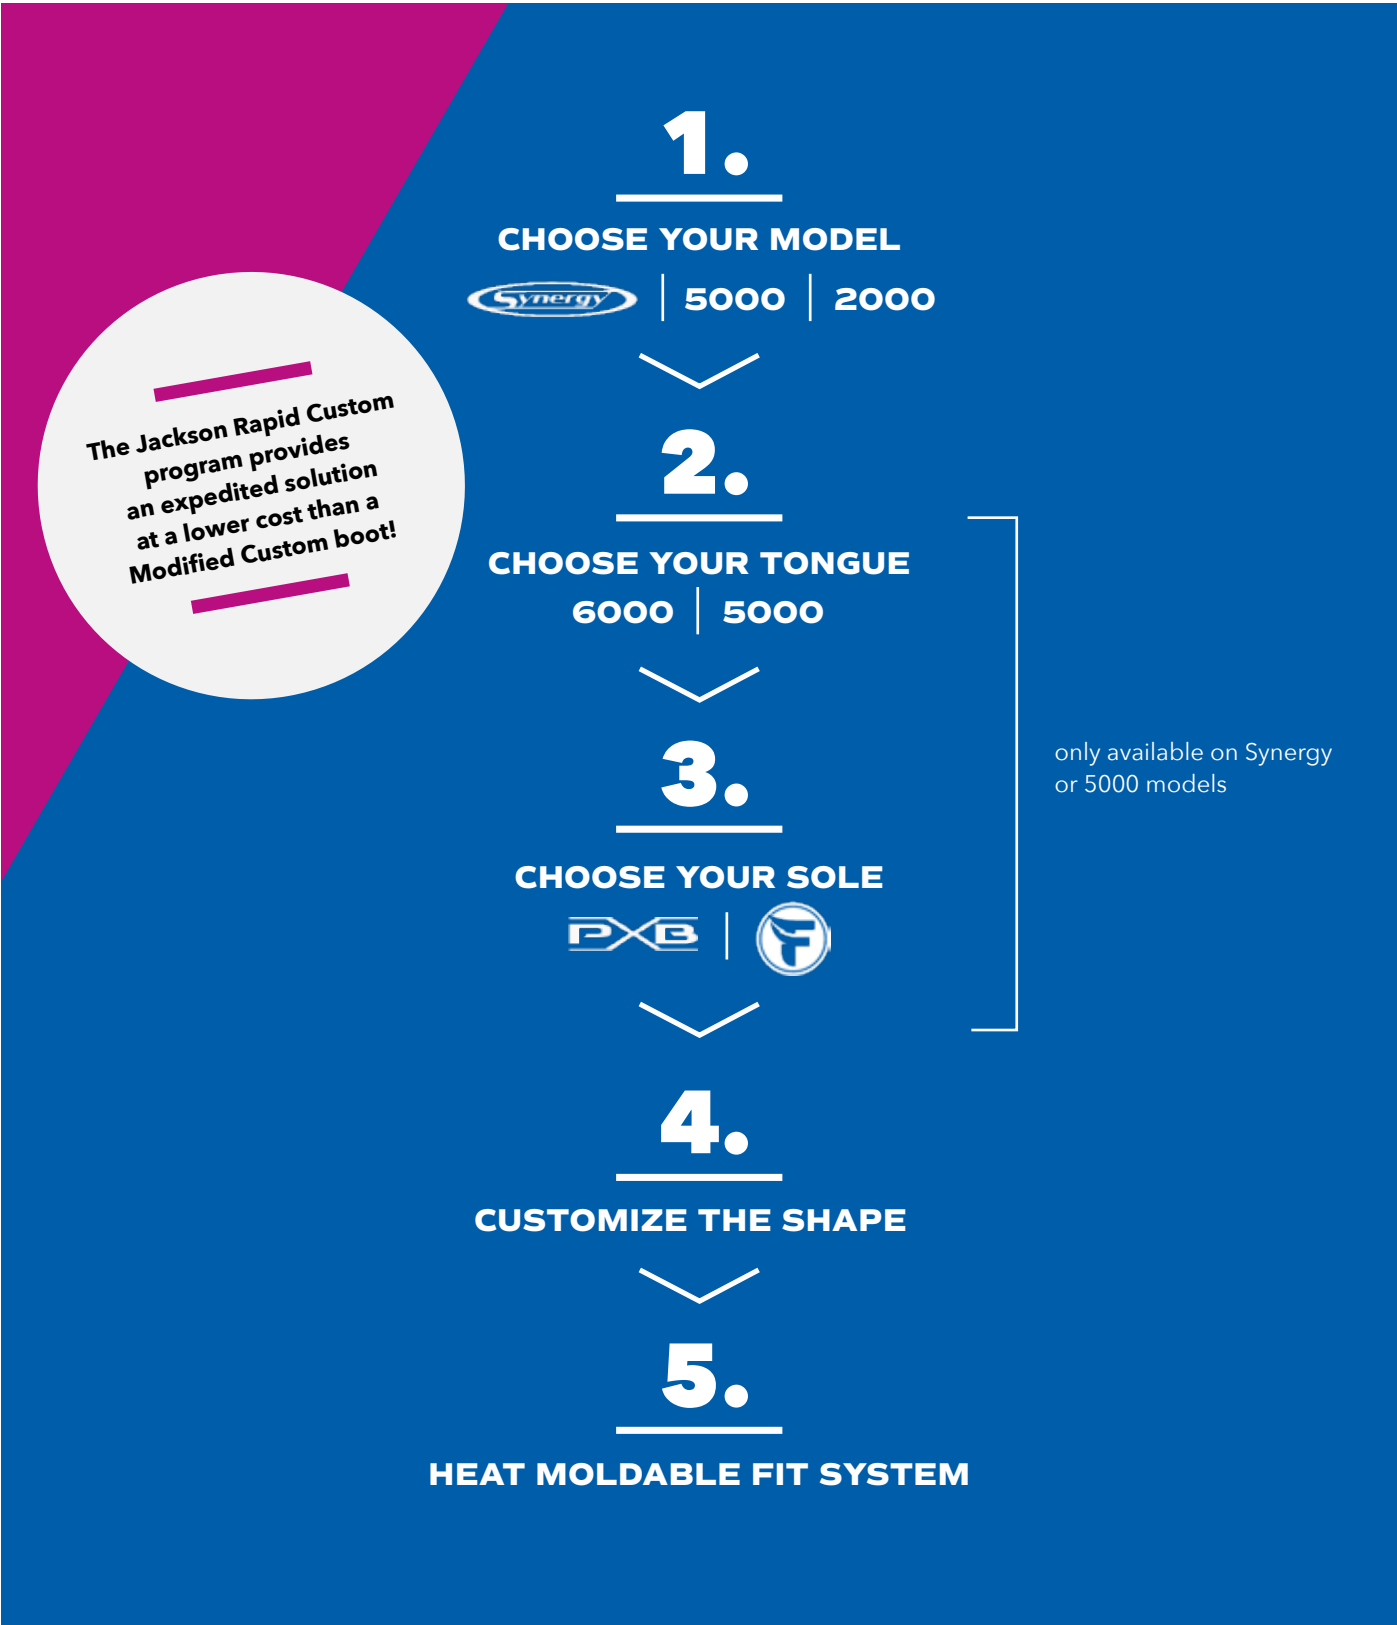

- 2 cm thick
- Microber lining
- Stiff, yet flexible support
- Hooks for increased stability
- Extended soft wings on sides
- Soft dip prevents shin irritation

# RAPID CUSTOM

At Jackson, we build standard uppers that require lasting, sole attachment and finishing. This allows our manufacturing team to modify for a specialized fit.

## 2000 Series

### *Built for Progress*

#### PREMIERE 2850/1

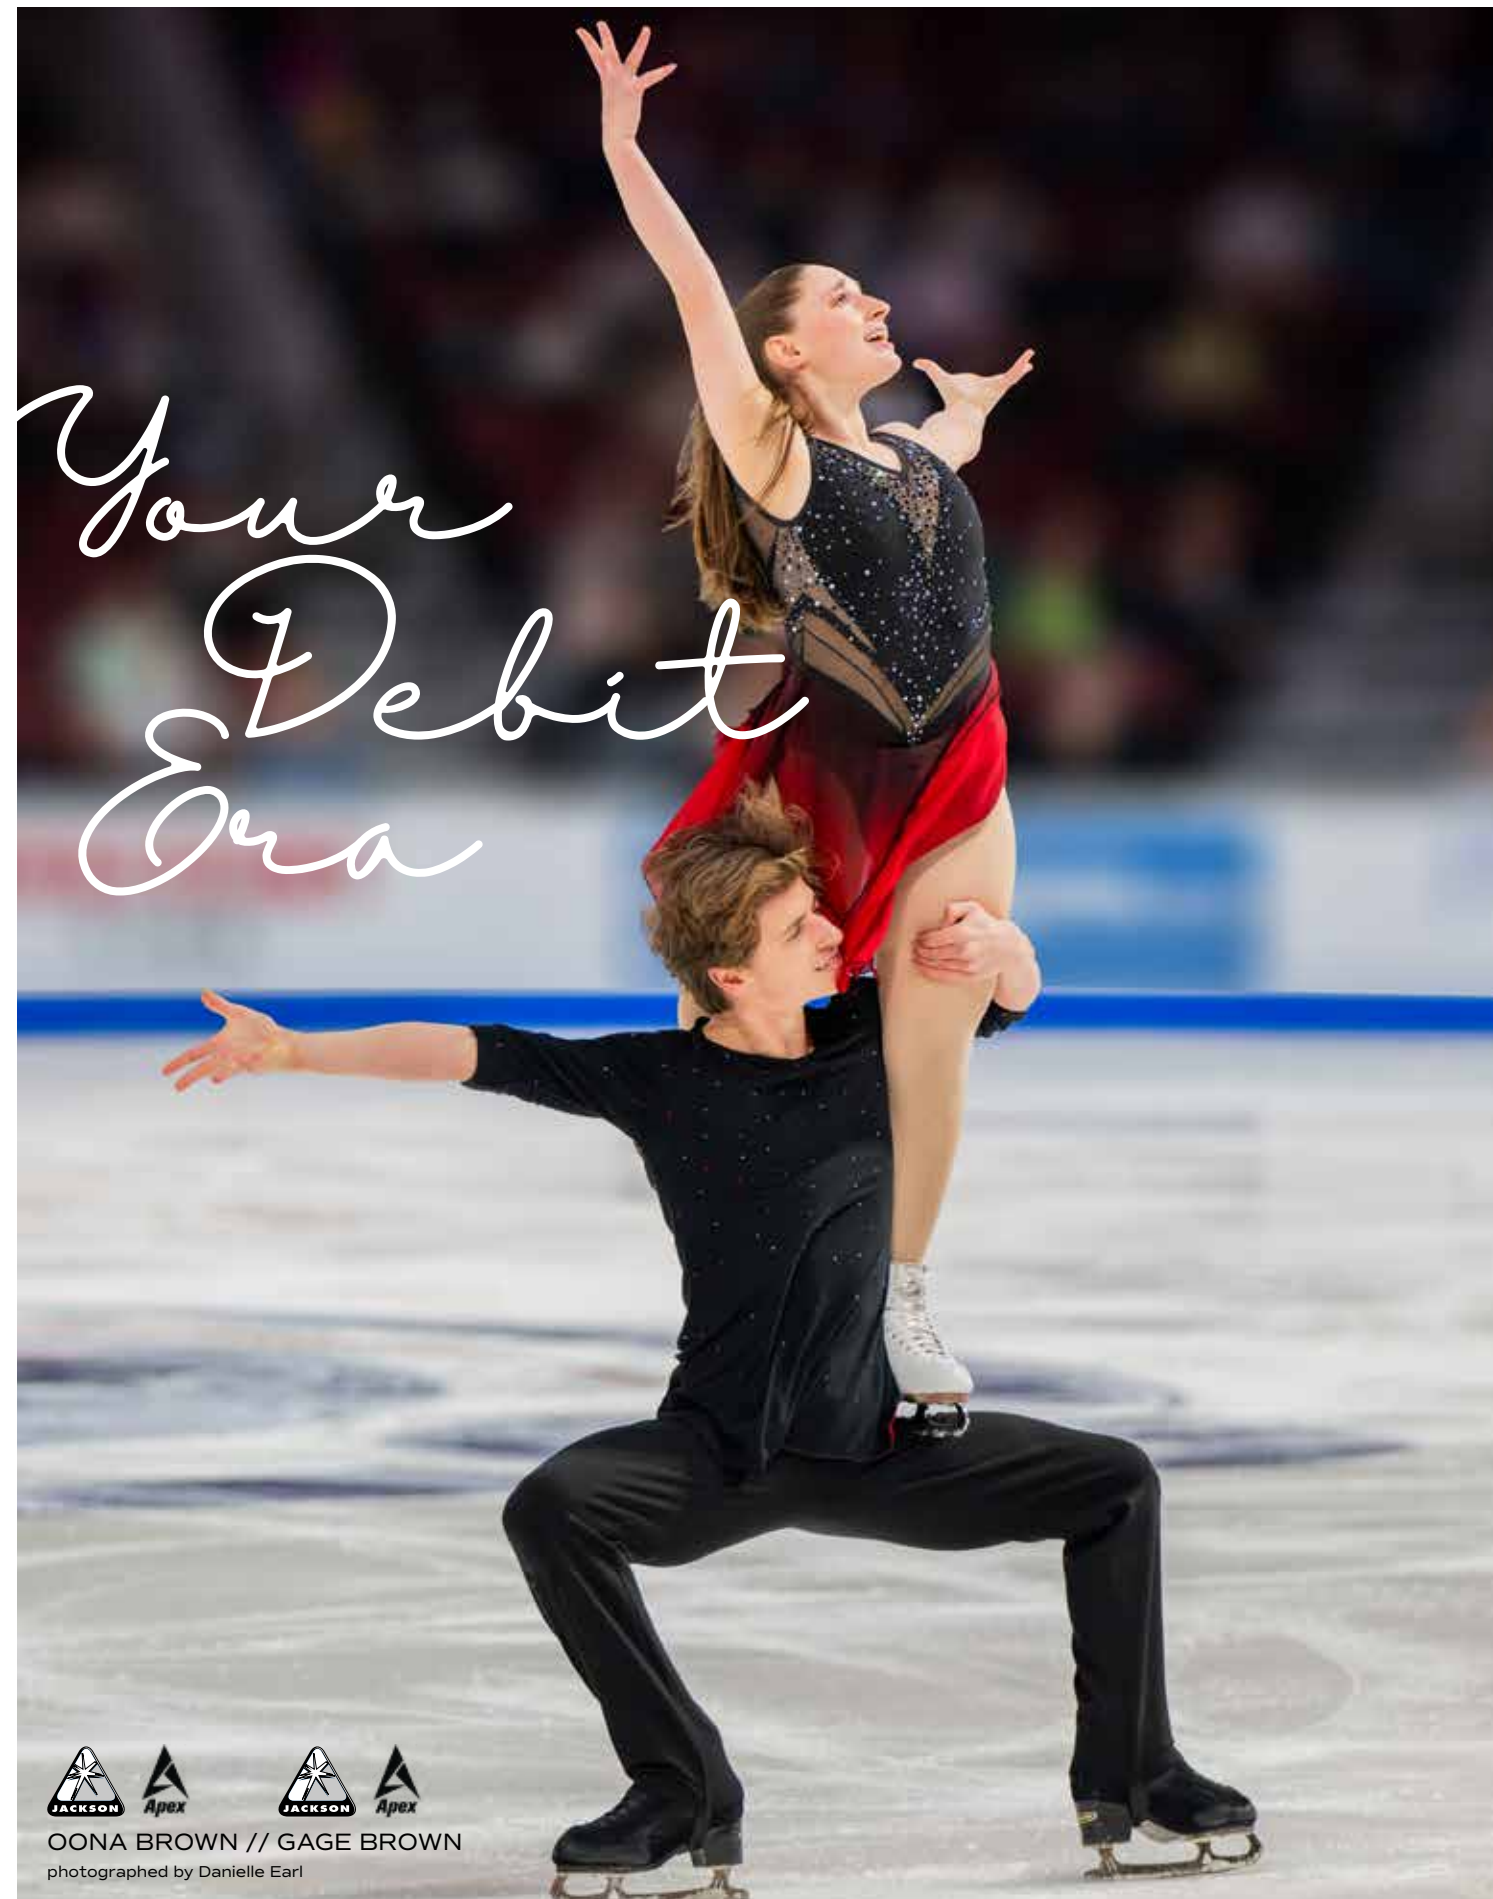

- Durable **leather upper** has remarkable flexibility & strength
- Non-abrasive microfiber lining is breathable & comfortable
- Extended wrap over the instep provides better fit & security
- Reinforced heel with aluminum plates eliminates sole separation
- Inlaid Swarovski crystals for Women's & Misses' Premiere (2850/1)

**Leather is Back.  
Timeless Craftsmanship,  
Modern Performance;  
Reimagined.**

## 2000 Series

*Built for Progress*

### FLEX 2000 / 2001

- Microfiber upper; flexibility & strength
- Non-abrasive fabric lining is odor-resistant & offers a soft feel
- Extended wrap (Entre) over the instep provides better fit & security
- Scratch-resistant Duraguard protection
- Inlaid Swarovski crystals

# BLADE FAMILIES

## Take Your Pick

Our blade families allow for pick preferences to be prioritized as a skater develops from an intermediate to an advanced level. In keeping rockers consistent, there is an ease of transition as skating skills evolve.

### DIAGONAL CUT TOE PICKS

- Lower drag tooth & lift angle allows for a faster acceleration to the toe pick on jump take-offs

Matrix RXS Freestyle

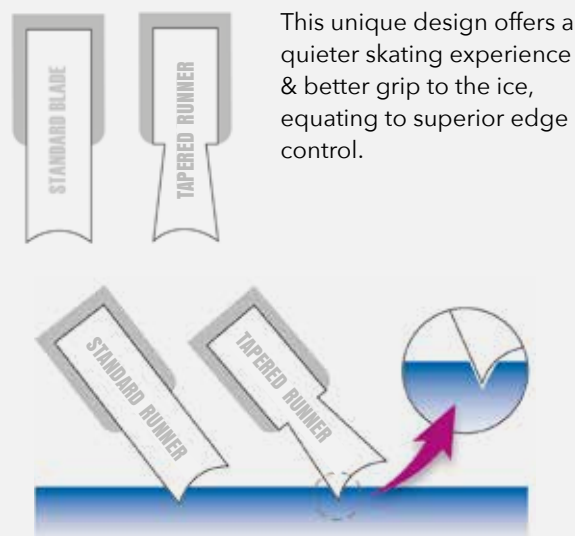

Apex Freestyle

#### SUPERIOR EDGE CONTROL

Featured in Matrix Advanced, Matrix RXS, & Apex Series

### STRAIGHT CUT TOE PICKS

- Larger second toe pick & slightly higher lift angle than diagonal-cut for added stability on edge jump take-offs

Matrix / Matrix RXS Elite

Apex Elite

Mirage

### CROSS CUT TOE PICKS

- Cross-cut maximizes grip on toe jumps
- The highest lift angle & drag tooth of the 3 blade families, offering the steepest launch angle on edge jumps

Matrix / Matrix RXS Supreme

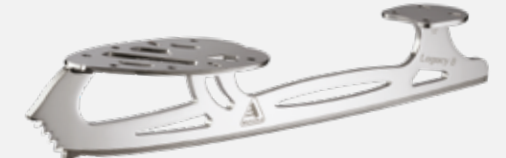

Apex Supreme

Matrix Legacy

Legacy Lite 8

Aspire XP

### 7' ROCKER BLADES

- Higher stanchions on Dance & Synchro blades for greater lean angle provides the advantage of deeper edges
- With the enhanced maneuverability of a 7' rocker, **Legacy Lite 7 is an ideal solution for skaters competing in both Freestyle and Synchro disciplines**

Apex Dance

MX7150

Cross-Cut Pick

FREESTYLE  
MX7120

Diagonal-Cut Pick

ELITE  
MX705

Straight-Cut Pick

- Ultra Lightweight Aircraft Grade Aluminum Chassis
- Japanese AUS8 Stainless Steel Runner

\*Available in SUPREME MX7156 & ELITE MX7106

**Matrix**  
**RXS**

**Runner Exchange System**

As blade height decreases with sharpening, the rocker position is altered. The ability to change runners allows skaters rocker consistency, eliminating the need to get accustomed to new blades. A spare set of sharpened runners provides convenience, consistency, & confidence. The runners fit all machines; a clamp is all you need. Same wheel; same profile. Same great sharpening. Need guidance? Our Skate Technicians look forward to helping you get set-up!

**AVAILABLE IN:**

### APEX SYNCHRO

Straight-Cut Pick

The Synchro blade's hybrid design addresses the evolution of the sport, which includes more jumps & technical elements.

### ULTIMA FINESSE

Straight-Cut Pick

The quintessential intermediate Dance & Synchro blade.

Lighter & Faster with the Superior Edge Quality of Stainless Steel

## MATRIX LEGACY

Cross-Cut Pick

- Ultra Light Weight Aircraft Grade Aluminum Chassis
- 420J Stainless Steel Runner

Matrix Legacy is also available in colors:

## LEGACY LIGHT

### LEGACY 8

Cross-Cut Pick  
8' Rocker; Standard Heel

Designed in response to a demand by top coaches, our Legacy Lite series features a lightweight cut-out design with a chrome finish; the perfect graduation from our Introductory Blades.

### LEGACY 7

Cross-Cut Pick  
7' Rocker; Standard Heel

## ASPIRE XP

Cross-Cut Pick

The cross-cut pick provides more grip on the ice for toe jumps.

## MIRAGE

Straight-Cut Pick

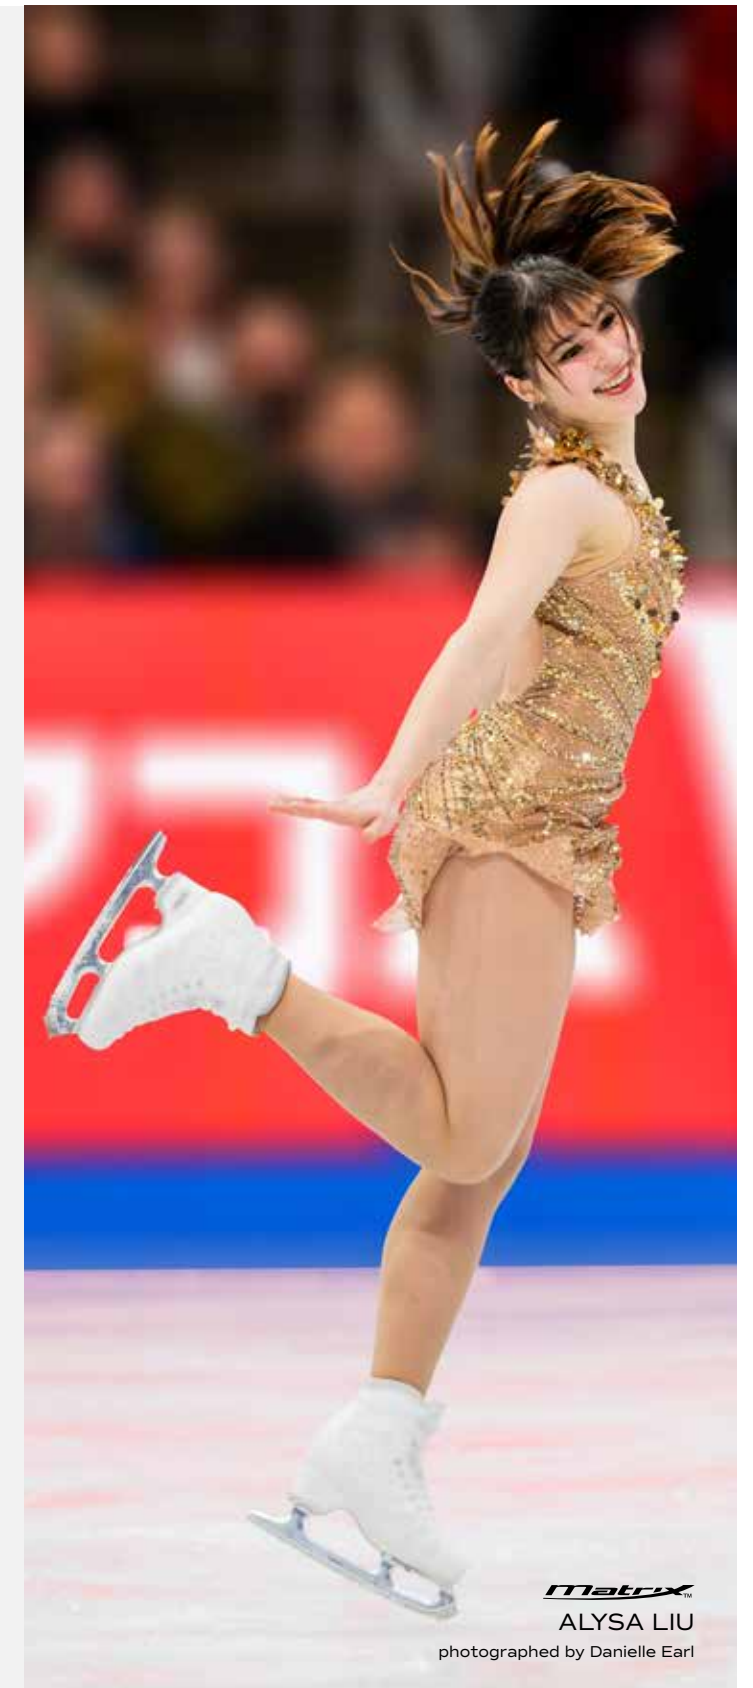

## MARK IV

Straight-Cut Pick

Straight-cut toe pick offers grip with a faster release out of the ice for toe jumps.
